Dear Sir,

APPROVAL OF THE STUMBELBLOC HOUSING SYSTEM

Valid for Five (5) years from the date of issue.

We confirm that approval of the 'STUMBELBLOC Housing System' by the National Home Builders Registration Council (NHBRC) is deemed to be acceptable and the system approval is extended for a further period of five years.

NHBRC has monitored the performance of the system and finds it generally acceptable for enrolment and an approval is granted for the limited roll-out of projects.

The performance of the product shall be reviewed annually and NHBRC reserves the rights to withdraw the approval of the system based on the structural performance of the building system.

All work is to be done in line with the rational design presented. Should NHBRC note any deviations from design, this may warrant a retraction of approval for enrolment. Although the rational design presented a generic solution, all work is to be designed and executed under the supervision of a competent structural engineer.

All NHBRC enrolment documentation, rational design information and certification on completion documents are to be signed by the competent design engineer.

Lastly, a comprehensive quality management document and construction manual must be submitted to the Technical Division, the provincial office where enrolment documentation is to be submitted, and also made available on all sites.

The responsibility rests upon the system owner to apply for extension of this letter of approval at least a month prior to expiry date.

If you need further information or clarification, please do not hesitate to contact our engineer, Mr Paimaan Byron on Tel: +27 11 317 0000 or Email: PaimaanB@nhbrc.org.za

Yours Sincerely,

Dr Jeffrey Mahachi
